3. Introduction of 6 Working Groups
4. Opportunity for You to Join a Working Group and Participate

# Oil & Gas Fracking

## Cochrane, Calgary & The Lochend

- Within 6 -12 miles in all directions of here, there are over 250 sections of land ready to be exploited by just three companies alone (i.e. they have purchased the mineral rights) MOSTLY WEST OF HW 22 (only 147 shown above – one company)
- And there are more companies
- And there is some Freehold
- And then there are the existing wells
- And there is, apparently, no limit (any more) on the number of wells per section
- Take a look at east of 22 and along 567 – Is that your desired future?
