Dear Mr. and Mrs. Campbell,

Please find attached a response from the Minister of Energy to your correspondence sent to the Premier of Alberta and Honourable Diana McQueen

Office of the Minister of Energy
780-427-3740

ALBERTA
ENERGY

*Office of the Minister
MLA, Calgary-West*

APR 29 2013

AR14989

Mr. Shawn Campbell and Ms. Ronalie Campbell
wagontr@platinum.ca

Dear Mr. and Ms. Campbell,

Your March 21, 2013 email to Premier Alison Redford and the Honourable Diana McQueen, Minister of Environment and Sustainable Resource Development regarding your water well has been forwarded to me. The Premier has reviewed your concerns and asked me to respond on behalf of the Government of Alberta.

The Energy Resources Conservation Board (ERCB), which I am responsible for as Minister of Energy, is currently leading the investigation to assess the presence of deep gas in your water well. Alberta Environment and Sustainable Resource Development continues to support the ERCB in their investigation to determine the origin of the deep gas. The ERCB has been keeping Environment and Sustainable Resource Development up-to-date with the investigation and receives copies of their reports and correspondence.

The sampling of your well for 2013 has not yet been scheduled, as the ERCB is currently waiting for your consent. On February 5, 2013, the ERCB requested written permission to conduct testing in the next few months. As you know, no definitive source for the deep gas has been identified to date. I strongly encourage your continued cooperation with the ERCB and its contractor, Alberta Innovates - Technology Futures so that the specific source can be identified.

Thank you for taking the time to write.

Sincerely,

Ken Hughes
Minister of Energy

cc: Honourable Alison M. Redford, QC
Premier

Honourable Diana McQueen
Minister of Environment and Sustainable Resource Development

Brad McManus
Acting Chairman, Energy Resources Conservation Board
